Overview

Upgrades Tree is a simple and efficient tool for creating a vast upgrade tree for your game. With some important functionality built it such as:

Scrollable view, Currency events, multiple levels per upgrade, upgrades unlock system, reflective UI to show which upgrade is affordable at any moment and more.

Getting Started

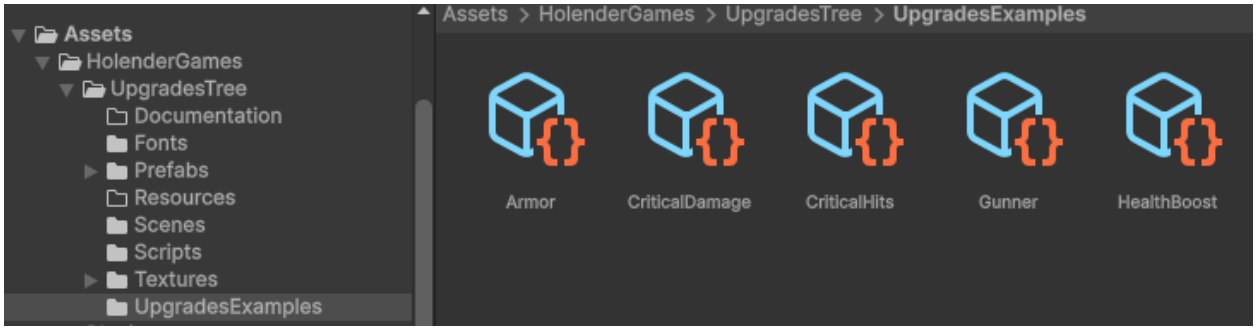
The best way to learn how to work with the asset is investigating the Demo scene included.

The main components and concepts of Upgrades Tree are:

- **UpgradeData**- the main scriptable object for storing the upgrade data for each upgrade in your game (name, descriptions, costs for each level, icon, etc)
- **UpgradeView**- handles the upgrade view in the tree
- **UpgradeTooltip**: The UI element that responsible for viewing the tooltip of your upgrade while hover on it.
- **UpgradesTreeManager**- managing unlocks of new upgrades and handling purchased upgrades according to your own game.
- **CurrencyManager**: a simple manager for the game's currency as an example. Can be extended to your own game multiple currencies
- **CurrencyViewer:** a simple script to show the currency to the player.

Your Upgrades

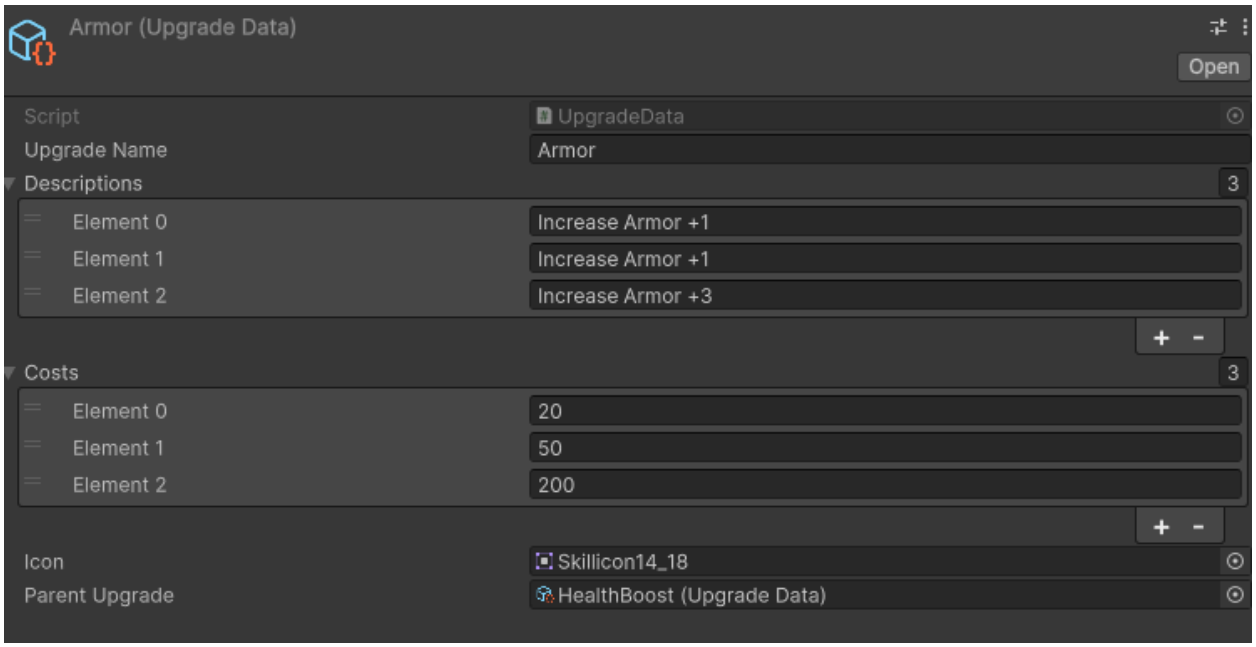
Create upgrades by creating or duplicating the example upgrades and edit them as you wish.



Upgrade Object

The basic upgrade object contains the following for you to edit:

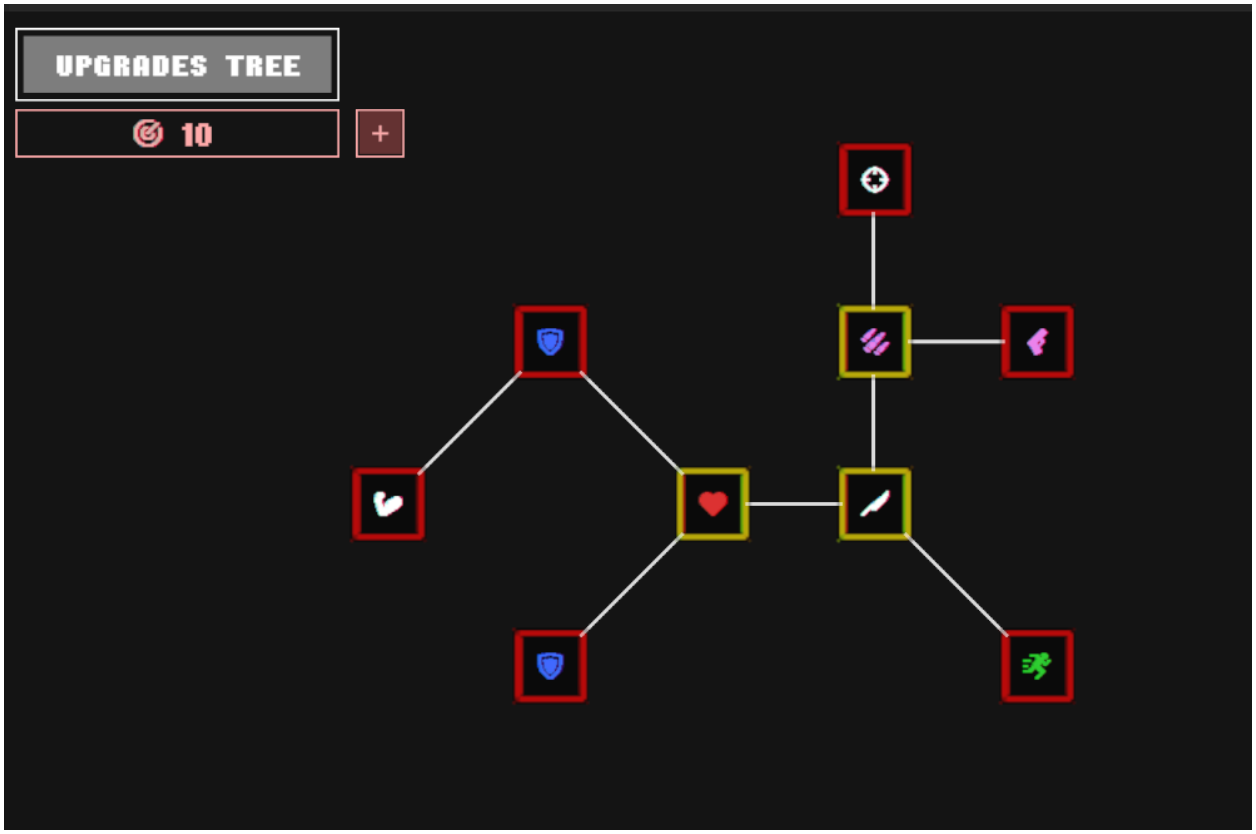
- Upgrade Name
- Description List to describe each level of this upgrade
- Costs List to define the cost of each level of this upgrade
- Icon
- Parent Upgrade: the upgrade that required to unlock this upgrade. (once the parent upgrade is being maxed, this upgrade will show up)



How To Build You Upgrades Tree

1. Create upgrades scriptable object as shown above
2. Create the tree layout using the helper Prefabs
3. Assign each prefab its relevant upgrade scriptable object.

That's All



Prefabs

Tooltip

The tooltip visuals. Can be modified as you wish according to your game.

UpgradeButton

The base upgrade button including the line connector to it's parent upgrade.

Just adjust the line to connect visually to the upgrade you want.

Or use the help prefabs.

Helper Prefabs

These prefabs are just variants of the UpgradeButton with the connector line adjusted to each of the directions:

Up, Down, Left, Right, Up-Right, Up-Left, Down-Right, Down-Left

For your convenience!
